

CORONAVIRUS

COVID-19

PREVENTION RECOMMENDATIONS

Taney County Health Department is working to keep the public up-to-date on the best prevention recommendations provided by the CDC for Novel Coronavirus 2019 (COVID-19).

1 WASH YOUR HANDS

Currently the CDC recommends WASHING YOUR HANDS as the best preventive practice. It is not recommended at this time to wear facemasks as a preventive step. Face masks should ONLY be worn if you suspect you may be ill.

TIP: CDC recommends washing hands for 20 seconds. Sing Happy Birthday two times.

2 SUSPECT YOU MAY BE ILL?

If you suspect you may be ill or may have been in contact with a person who is ill please contact your doctor or primary healthcare provider. If you do not have a doctor, Cox Health is offering virtual visits at <https://www.coxhealth.com/services/virtualvisits/>. Use code COVID. MODHSS has set up a 24-hour hotline to answer questions about COVID-19: 877.435.8411

3 EFFECTIVE DISINFECTANTS

The CDC has provided a list of household disinfectants effective against the COVID-19. To see the complete list visit: <https://www.americanchemistry.com/Novel-Coronavirus-Fighting-Products-List.pdf>

TIP: See product label for disinfecting instructions and EPA registration number

Most common and currently available disinfectants:

- **Clorox® "Clean Up Cleaner + Bleach"**, [EPA Registration Number: 5813-21]
- **Clorox® "Multi Surface Cleaner + Bleach"**, [EPA Registration Number: 5813-105]
- **Lysol® "Disinfectant Max cover Mist"**, [EPA Registration Number: 777-99]
